1,306,800 SQUARE FEET OF BEAUTY FOR SALE

That's right! Thirty acres of healthy and vigorous young trees, shrubs and flowers.
While many of these have been imported, they have all been replanted and adapted to local conditions before being offered for sale.
That is why it is possible for us to guarantee unconditionally, for one year, all our nursery stock.

PATCHY?

The patchwork quilt idea of landscaping (where a little is done this year and a little is done next year) has given over to the

LAYRITZ PLAN

where ALL is done at one time by B.C.'s largest and oldest firm (Since 1889). The deferred payments carry NO interest.

HOW MUCH?

Professional landscaping costs only a fraction of the dollar value it adds to your home.
Establishing this cost is a service we gladly give.

FREE

For a verdant green lawn, try our lawn seed special. Top quality and only 85c lb.

"FOREST" CEDAR SIDING

WHAT IS FOREST SIDING?

Made of dry 1½" Stock 8, 10 and 12-inch widths, "FOREST" Siding is a new type of Siding obtained from specially selected Cedar logs sawn to show the beauty and character of knots, burls, etc.

WHAT ARE ITS QUALITIES?

"FOREST" Siding with its substantial thickness and greater wood volume adds to the structural strength and solidity of the building.

The design of "FOREST" Siding ensures a tight weather seal of the lap which, together with its thickness and flush-to-base principle, makes excellent material from the insulation standpoint.

"FOREST" Siding represents an economy to home-builders. Costing less than most other types of Siding the lap design ensures easy fitting and speedy application at less labor cost.
